Introduction

The goal of our visualization:

To help users have a basic understanding of wine, such as producers among the world, trade between countries and analysis in these countries.

The Answer We Want To Find

1. Which country produces the most types of wine?
2. How about wine trade between these countries?
3. Which region produces highest scores/ price/ value of wine?
4. Which is the highest scores/cheapest/most expensive wine/ best value in a specific region?

DataSet

We have two datasets, wine review and wine trade.

They come from:
